

Premium Bulk Compost for Delmarva Nurseries, Turf & Landscapes

**Proudly made in Seaford, Delaware
our compost:**

- Weed-free source of organic matter for healthy soil
- Suitable for topsoils, backfill mixes, and gardening applications
- Enhances soil fertility with slow-release nutrients and increased organic content
- Improves root growth by loosening compacted soils and supporting strong root systems
- Retains up to 16,500 gallons of water per acre for every 1% increase in organic matter
- Reduces drought stress and improves water-holding in sandy soils
- Blends well with peat moss and is a cost-effective alternative to peat-humus and mulch

STA CertifiedTM COMPOST

A program of the US Composting Council

Clarity, Consistency and Confidence

Our compost is STA Certified through the Seal of Testing Assurance Program, the only program of its kind in the U.S. Created by leading compost scientists, STA Certification ensures your compost meets rigorous, standardized testing for clarity, consistency, and confidence. It's compost you can trust, delivering integrity, reliability, and dependable results for your soil needs.

Transforming Agriculture in Delmarva

At the Bioenergy Innovation Center we champion the transformation of agriculture in Delmarva with our premium natural compost and superior soil amendments. Our commitment is to foster fertile lands and sustainable farming.
